
Nevanlinna Theory And Complex Differential Equations

lectures on nevanlinna theory - purdue university - lectures on nevanlinna theory alexandre eremenko* july 20, 2012 value distribution of a rational function f is controlled by its degree d , which is the number of preimages of a generic point. **nevanlinna theory and holomorphic mappings between ...** - nevanlinna theory and holomorphic mappings between algebraic varieties 147 (b) can we find a lower bound on the size of z_s , again in terms of z and the growth of the mapping? we are able to give a reasonably satisfactory answer to (a) in case $\text{codim}(z) = 1$ and to **diophantine approximation and nevanlinna theory** - diophantine approximation and nevanlinna theory paul vojta abstract as was originally observed by c. f. osgood and further developed by the author, there is a formal analogy between nevanlinna theory in complex analysis **nevanlinna theory of the askey-wilson divided difference ...** - nevanlinna theory for slow-growing meromorphic functions with respect to the aw -operator on c for which the associated picard theorem follows as a special case, just as the classical picard theorem is a simple consequence of the classical nevanlinna theory ([41], see also [42], [27] and [50]). this approach allows us to **introduction to nevanlinna theory - uh** - introduction to nevanlinna theory min ru university of houston minru@math.uh 1/1. introduction: the algebraic case i the well-known fundamental theorem of algebra states that, for every complex polynomial p , $\deg p = \#(p = 0)$: i for any rational function f on a compact riemann surface s , **11. the principal characters in nevanlinna theory** - theorem 6 (first fundamental theorem of nevanlinna theory). let f be a non-constant meromorphic function on c . then, for any $a \in c$, we have $t_f(r, a) = t_f(r) + o(1)$ as $r \rightarrow \infty$. the implied constants in $o(1)$ depend on f and a . proof. the idea is to simply rewrite jensen's formula in terms of the functions introduced in the previous section. **lecture #1 1. nevanlinna theory nevanlinna theory** - lecture #1 §1. nevanlinna theory nevanlinna theory is part (most) of value distribution theory of holomorphic functions consider the function ez has no zeroes or poles, so as a map $c \rightarrow p^1(c)$ it omits the values 0 and ∞ .
